OBJECTIVE

An exceptionally creative individual with internship experience in software engineering, I am passionate about leveraging my skills to drive innovation and contribute to the growth of the organization. As a Software Engineer, I aim to bring fresh perspectives and problem-solving abilities to the team, while continuously learning and expanding my professional horizons.

EXPERIENCE

Software Engineer Intern

Jupitice Justice Technologies | Chandigarh, India   Nov 2023 – April 2024

Key Responsibilities: -

- **Development:** As part of the development team, my focus was on integrating the data visualization component into the product using third party libraries for visualizations.

- **Business Intelligence Developer:** As a BI, I handled requests from different departments, and providing them the data in diverse formats such as graphs, charts, pie charts, heatmaps etc, by extracting the data from database using SQL queries.

- **Data Analyst:** Use SQL to extract, manipulate and analyze raw data, facilitating the derivation of actionable insights. Provided insights and supported decision-making processes by analyzing data effectively.
